The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

## **DETAILED ACTION**

The following is a quotation of the appropriate paragraphs of 35

U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi (PG Pub 2001/0019482).

With regard to Claim 14, Kobayashi discloses in Figs 7 and 8 an IR rayradiating lamp for an automobile. Kobayashi discloses a reflector (16), a light
source (20), a tubular lens holder (12), a convex lens (14) mounted to the
tubular lens holder (12), an IR transmitting film (24 and 25) traversing light path
between reflector and convex lens (14), and an IR light transmitting film free
region (32 and 26) provided on outer periphery of IR transmitting globe (30B) in
Figure 8 which is coated with an IR transmitting multilayer film (24) (Pg 4, Para
[0061]). Kobayashi further discloses in Fig. 12, a means being a mirror and
convex reflector surface (36 and 37) for blocking direct light between the light
source (20) and reflector (16) and the IR transmitting film while allowing other
light to enter a film free region, in Fig 12 being the lens (14) that is not coated by
an IR transmitting film.

With Regard to Claim 15, Kobayashi discloses all of the elements in Claim 15, but fails to explicitly disclose a means for directing light to the outer periphery

Art Unit: 2875

of the IR transmitting film region in a sufficiently small or great amount to offset the red light and not cause glare. However, it is implicit that adjusting the film free region (32(26) size as disclosed in Figure 8, would reduce the red light as well as reduce or prevent white light glare as opposed to Figure 6.

## Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach a light shielding member provided on lens holder and disposed to the rear of rim portion of a convex lens.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gehly (US Pat. 4,651,257) discloses a lighting fixture with a glare shield positioned about the central axis of the fixture. Albou (PG Pub. 2001/0050344) discloses a infrared light unit for a motor vehicle.

Art Unit: 2875

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert May whose telephone number is (571) 272-5919. The examiner can normally be reached between 9 am– 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax number for the organization where this application or proceeding is assigned is (703) 872-9306 for all communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval PAIR system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
